

ABSTRACT OF THE DISCLOSURE

There is provided a server apparatus that is connectable to client apparatuses via a radio transmission medium. The server apparatus includes
5 a storage unit storing list data indicating a priority order of the client apparatuses in allocating an exclusive period thereto, the exclusive period being a period in which exclusive use of the radio transmission medium is permitted, a control unit
10 configured to allocate the exclusive period to the client apparatuses in accordance with the priority order indicated by the list data, and a processing unit configured to rearrange the priority order of the client apparatuses on the list data using situation
15 data indicating a situation of one of the client apparatuses, when the situation data is transmitted from the one.
